

BlueCredit

Investing in a water positive future

Problem

No formal Water Credit Marketplace exists

Biodiversity ✓

Storm nutrient ✓

Wetland ✓

Carbon ✓

The Gap – Water X

- Corporations have \$B+ ESG water targets with no formal offset mechanism
- Voluntary projects are unverified & non-tradeable
- Regulators accept water offset concepts but lack platforms

The Solution

A **BlueCredit** is a verified and tradeable **Water Offset Credit** that has a volumetric benefit over time issued within a **WATERSHED**.

A **BlueCredit** is a verified and tradeable **Water Credit** that has a volumetric benefit over time issued within a **WATERSHED**.

BlueCredit is the first verified water credit marketplace, enabling corporations to offset their water consumption through certified watershed restoration projects.

Platform

Why Now

Three converging forces make 2025–2026 the moment for a water credit marketplace

Regulatory Momentum

- › SEC climate disclosure rules now require water-related risk reporting
- › CDP water questionnaire adopted by 23,000+ companies globally
- › EU CSRD mandates water stewardship reporting from 2025
- › US EPA water quality trading frameworks gaining state adoption

Corporate ESG Commitments

- › Google, AWS, Coca-Cola & Merck have pledged to be 'water positive'
- › \$50B+ in ESG capital allocated to water stewardship targets by 2030
- › Yet no standardized credit exists to claim or verify offset
- › Companies face greenwashing risk without verified credits

Technology Is Ready

- › Blockchain now enables immutable, watershed-scoped credit issuance
- › AI/ML allows accurate volumetric water benefit (VWB) calculation
- › Geospatial tools provide real-time watershed boundary monitoring
- › Carbon market blueprint provides a proven regulatory playbook

Market Opportunity

Project-wise Target Segment

Global water use for industrial; agricultural & municipal is projected at **1.5QGal by 2050**. Up **5%** compared to current levels. Requiring **100T to offset**

Competitive Advantage

Product

BlueCredit Marketplace Platform

Credit Registry

Watershed-scoped issuance, blockchain chain of custody, geospatial boundary mapping

VWB Calculator

AI-driven volumetric water benefit accounting per project type and region

Trading Dashboard

Offtake marketplace, price discovery, credit retirement & ESG reporting exports

Verification Engine

Third-party cert integration (CDP, AWS), audit trails, token minting controls

Subscription Tiers

Community · Professional · Enterprise · Investor — monthly platform fees

IP & Patent

Patent Pending #63/728,789 — Volumetric Water Benefit methodology
