

CAPABILITY STATEMENT

Core Competencies

BlueCredit Water Consulting brings expertise in the following areas:

- **Watershed Modeling** for integrated surface water, groundwater, and stormwater systems, enabling basin-scale analysis
- **Water Sustainability** for water stewardship and ESG-aligned frameworks including water risk assessment, disclosure, and regulatory compliance support.
- **Water Management** including institutional water management plans, audits, and legionella risk assessment.
- **Water Projects Management** providing delivery of water infrastructure projects including stormwater, supply systems, reuse, and treatment facilities
- **Data, Analytics & Reporting** developing GIS dashboards and digital twins for water, stormwater and wetland mitigation credits enabling transparent tracking and reporting

Differentiators

Our Differentiators:

- DMV-based firm with deep expertise water sustainability, water resources engineering and sustainability strategy.
- Cost-efficient, integrated delivery model combining advisory, engineering, field execution, and GIS/analytics-driven decision support with strong repeat-client performance
- Digital water expertise in developing online water applications for water utilities and watershed management.

Past Performance

- **PRIME / LEAD – BlueCredit.** Developed the BlueCredit platform, including architecture & GIS integration. Built water accounting and crediting methodologies, incorporating watershed and infrastructure data for credit generation, tracking, and ESG reporting.
- **SUBCONTRACTOR – Clark Nexsen | Virginia DOT IDIQ.** Executed multiple stormwater projects across DMV Counties for roadway improvements, pedestrian trails, intersection upgrades and bridge hydraulics. Awarded 2024 (\$50,000).
- **SUBCONTRACTOR – Kleinfelder | Bald Eagle Village South Field Groundwater Modeling and NJPDES Support (NJ) for Suez Water.** Performed 3D groundwater flow and contaminant transport modeling using MODFLOW to evaluate the impact of a Large Subsurface Sewage Disposal System. Awarded 2021 (\$20,000)
- **SUBCONTRACTOR – The Balmoral Group | FDOT Task Orders.** Water engineering support for FDOT and CFX projects across Florida incl. stormwater modeling, drainage design, pond siting, and floodplain/bridge hydraulics analysis (\$100,000).
- **SUBCONTRACTOR – The Balmoral Group | ESG assessment for Australian Grain Research Development Corporation** and a phased roadmap for sustainability in grains supply chains (\$22,000).

Company Data

Background

BlueCredit Water Consulting provides science-based water sustainability, engineering, and digital water management services, translating complex hydrologic, hydraulic, engineering, regulatory, and public health requirements into practical, data-driven strategies that ensure compliance, improve operational performance, and strengthen long-term facility and watershed resilience.

Contracting Readiness

- Registered in SAM.gov
- Available for prime and subcontracting opportunities
- Ability to support federal and local water projects through technical advisory and engineering services
- Capable of performing under federal, state, municipal, and private-sector procurement frameworks
